## Discharge Instructions

ديسشهارغ ینستروشتيونس §.....

Abdominal or stomach pain can be caused by many things. Your caregiver decides the seriousness of your pain by an examination, and possibly blood tests and x-rays. Many cases can be observed and treated at home. Most abdominal pain in children is functional. This means it is **not** caused by a disease and will probably improve without treatment.

## HOME CARE INSTRUCTIONS:

- Do not take or give laxatives unless ordered by your caregiver.
- Take pain medication only if ordered by your caregiver.

## Instructions on MyChart enrollment

§ ..... ينستروشتيونس ون ماشهارت عئرو للمعت

# Pneumonia

Pneumonia is an infection of the lungs. It may be caused by a virus or by bacteria. It can spread easily. You can catch it from being close to someone who is already sick (*contagious*). The sick person may cough or sneeze. This can spread the germ through tiny drops that get sprayed into the air.

## HOME CARE

- Only take medicine as told by your doctor.
- A vaporizer may help loosen mucus.
- To reduce coughing, sleep so you are almost sitting up (*semi-upright*).
- Rest.
- **Do not** smoke.

A shot (*vaccine*) can prevent one type of pneumonia. Shots are advised for:

- Everyone age 65 and older.
- Chemotherapy patients.
- People with immune system problems.
- Children and adults with certain medical problems.

Ask your doctor if you should get this shot. Write down the date when you received the pneumococcal shot. If you do not know when you had the shot, ask your doctor.

## GET HELP RIGHT AWAY IF:

- You have shortness of breath or chest pain.
- You or your child has a temperature by mouth above 102° F (38.9° C), not controlled by medicine.
- Your baby is older than 3 months with a rectal temperature of 102° F (38.9° C) or higher.
- **Your baby is 3 months old or younger with a rectal temperature of 100.4° F (38° C) or higher.**
- You cough up mucus (*sputum*) that is yellow, green, or brown.

### Instructions on MyChart enrollment (continued)

- You cannot control your coughing.
- You cough up blood.
- The pain gets worse, even with medicine.

## MAKE SURE YOU:

- Understand these instructions.
- Will watch your condition.
- Will get help right away if you are not doing well or get worse.
